

Amendments to the Specification

Please amend the **Specification** as follows:

Substitute the following corrected paragraph for the original paragraph [0027]:

[0027] To better understand how the process and equipment of FIG.1 relate to the present invention as shown in FIG. 2, a more detailed description of the methanol process will now be set forth. Throughout the following descriptions, examples of temperatures and pressures may be given at respective stages of the processes carried out in accordance with those shown in FIGS. 1 and 2. However, it should be recognized that these temperatures and pressures are only illustrative of the anticipated conditions within the system for a particular operation and actual values ~~[[any]]~~ may vary in other processes without departing from the present invention. The recited conditions are based on a typical process in accordance with the present invention wherein 12.8 million standard cubic of feed gas (i.e. natural gas) is processed per day ~~[[with]]~~ wherein certain components of the equipment of a 350,000 tonnes per year methanol plant (FIG. 1) ~~[[is]]~~ are re-used in FIG. 2.
